

UNIDAD 1: Cláusulas relativas (respuestas)

Texto 1

Preguntas:

1. ¿Cuál era la ocupación del padre de Galileo?

Músico

Galileo Galilei was born in Pisa on February 15, 1564. He was the oldest son of Vincenzo Galilei, **who was a musician**.

2. ¿En qué ciudad estaba la escuela a la que asistió Galileo?

Florenia

In the 1570's, his family moved to **Florence**, Italy, **where he attended a monastery school**.

3. ¿Qué estudió durante muchos años?

El movimiento

He also began to study **motion which he continued to do for many years**.

4. ¿Qué ayuda recibió de Guidobaldo del Monte?

Lo ayudó a obtener un cargo de matemática en la Universidad de Pisa.

Because of his work on gravity, he was noticed by Guidobaldo del Monte **who helped him obtain a position in mathematics at the University of Pisa**.

5. ¿En qué consistió el experimento de la torre inclinada de Pisa?

En arrojar dos objetos desde diferente peso desde la parte superior de la torre para probar que la velocidad de un objeto no se relaciona con su peso.

At the Leaning Tower of Pisa, Galileo conducted the famous experiment **where he dropped two objects of different weights from the top of the tower**. He wanted to prove that the **speed of an object is not related to its weight**.

6. ¿A quién había seguido Galileo antes?

Al griego Aristóteles.

This experiment refuted (termed wrong) the theories of **the Greek Aristotle whom Galileo had followed before**.

Actividad

1. Gravity is a force which pulls objects together. (pronombre; especificativa)
2. Elephants, which are the largest land mammals, live in herds of 10 or more adults. (pronombre; explicativa)
3. Nomads are farmers who wander from place to place in the desert. (pronombre; especificativa)
4. The nutrients that are found in the food are usually needed for good health. (pronombre; especificativa)
5. Hormones act as chemical messengers that carry instructions to other cells to change their activity. (pronombre; especificativa)
6. Deserts are areas of land where there is almost no rainfall. (adverbio; especificativa)
7. Plasma, which is mostly water, is an important component of blood. (pronombre; explicativa)
8. Proteins supply energy and amino acids, which build and repair the cells in the body. (pronombre; explicativa)
9. The place where two bones come together is called a joint. (adverbio; especificativa)
10. There are several organs [that contain cells (that secrete hormones)]. (pronombre; especificativa)

Texto 2

1. Frases nominales:

- a) man-made synthetic compounds
compuestos sintéticos (hechos por el hombre)
- b) harmful ultraviolet radiation from the Sun
la dañina /nociva /perjudicial radiación ultravioleta del Sol
- c) the Earth's surface
la superficie de la Tierra /terrestre
- d) Southern hemisphere springtime
la primavera en el hemisferio sur
- e) a large ozone hole over the continent
un gran agujero de ozono sobre el continente
- f) the special atmospheric conditions
las condiciones atmosféricas especiales

- g) the isolated wind patterns
los patrones de vientos aislados
- h) the presence of continuous sunlight
la presencia de luz solar continua / la presencia continua de luz solar
- i) this cycle of ozone hole formation and reparation
este ciclo de formación y reparación del agujero de ozono
- j) the greater population in the higher latitudes of the Northern Hemisphere
la mayor (cantidad de) población en las más altas latitudes del hemisferio norte

2. Respondé las siguientes preguntas:

- 1) ¿En qué circunstancias ocurre la pérdida de ozono?
Cuando el equilibrio natural entre la producción y la destrucción del ozono estratosférico se inclina a favor de la destrucción. / Cuando se destruye más ozono del que se produce.
- 2) ¿Cuál es en la actualidad la principal causa de esta pérdida?
La contaminación generada por el hombre.
- 3) ¿En qué capa de la atmósfera se da este fenómeno?
En la estratósfera.
- 4) ¿Cuándo se da la mayor pérdida en la atmósfera?
Durante la primavera en el hemisferio sur.
- 5) ¿En qué se miden los niveles de ozono?
En unidades Dobson.
- 6) ¿Qué representa la cifra 300 D.U.?
La cantidad mundial promedio de ozono estratosférico.
- 7) ¿A qué se debe la formación del agujero de ozono en la Antártida?
A las condiciones atmosféricas especiales: temperaturas estratosféricas muy bajas, patrones de vientos aislados y presencia de luz solar continua.
- 8) ¿Cómo y cuándo se repara el agujero de ozono en la Antártida?
Cada verano cuando suben las temperaturas estratosféricas y el aire sobre la Antártida se mezcla con el resto de la atmósfera.
- 9) ¿Cuándo se inició este fenómeno del agujero de ozono?
A principios de la década del 70.
- 10) ¿Por qué es igualmente preocupante la formación de un agujero de ozono moderado en el Ártico?
Debido a la mayor (cantidad de) población en las más altas latitudes del hemisferio norte.

3. Cláusulas relativas

A common misconception is that there is an ozone hole above us in the sky **which is admitting harmful ultraviolet (UV) radiation from the Sun.** (pronombre)

However, in certain parts of the world, ozone depletion is particularly severe, and it is in the regions **where the term “ozone hole” strictly applies.** (adverbio)

The formation of the ozone hole over Antarctica is a consequence of the special atmospheric conditions **which occur there...** (pronombre)

The natural circulation of wind – the polar vortex – **which isolates Antarctica from the rest of the world during the Southern Hemisphere winter and early spring...** (pronombre)

The Right Job for Your Personality

Choosing a career is an important life decision, yet many people settle on one based on the opinions of friends and family. It's very difficult to find something you really enjoy doing, but scientists have devised tests to help people come closer to finding their dream job.

One of the most widely-used tests is the Holland Code. Psychologist John Holland worked for more than 50 years to develop his theories about personality and career choice. He created a set of six personality types to help people understand what careers might be best for them. Dr. Holland believed people work best in environments **that match their personalities (especificativa)**, and the key to finding a satisfying career is to match your fundamental interests with an occupation.

Take a look at the six personality types below. Most people are a combination of two or three types.

Realistic

Realistic people like to work with things **that they can see or touch (especificativa)**. They are inclined to solve problems by doing them, rather than thinking or talking about them. They generally like to work outside and are good with tools, machines, plants, and animals. Job matches: **carpenter, chef, nurse, pilot**

Investigative

People **who belong to this personality type (especificativa)** value ideas and are strong at tasks **that allow them to investigate facts and figure out complex problems (especificativa)**. They are better at individual work like research and study, rather than leading groups of people or working in teams.

Job matches: **computer programmer, historian, psychologist, surgeon**

Artistic

Artists are creative people **who don't work well with structure and rules (especificativa)**, and thrive instead in environments **that allow communication and a free flow of ideas (especificativa)**. They enjoy tasks **that allow them to express themselves and mix with people. (especificativa)**

Job matches: **actor, art therapist, graphic designer, writer**

Social

Social personalities love to work with people. They get the most satisfaction out of teaching and helping others, and are driven to serve the community as opposed to making money.

Job matches: **coach, counselor, social worker, teacher**

Enterprising

Many great leaders and business people have enterprising personalities. These are persuasive people **who are good at making decisions and leading teams (especificativa)**. They tend to value money, power, and status, and will work toward achieving them.

Job matches: **business owner, event manager, lawyer, salesperson**

Conventional

Conventional people appreciate rules and regulations, and like having structure to their lives. They are logical thinkers and have a lot of self-control, **which makes them the perfect people to work with data and details (explicativa)**.

Job matches: **accountant, analyst, editor, librarian**

Nowadays, anyone can take a Holland Code personality test online to find what jobs might be right for them. Why not try it today?
